Art Unit 1802

12-

1.) Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-28 and 46-48, drawn to methods for detecting cells and analytes, classified in Class 435, subclass 7.2.

II. Claims 29-45 and 49, drawn to apparatus and kit, classified in Class 422, subclass 58.

2.) The inventions are distinct, each from the other because of the following reasons:

The inventions of Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as affinity chromatography.

3.) Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4.) Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
